

Manas Ranjan Sethi

Founding / Full-Stack Flutter Engineer

+91-8847879562 • [LinkedIn](#) • [GitHub](#) • manassethi2201@gmail.com • Odisha, India

EDUCATION

B.Tech in Computer Science and Engineering
GIET University

2021 – 2025
Gunupur, Odisha

TECHNICAL SKILLS

Mobile Development	Flutter, Dart, GetX, Provider, BLoC, Riverpod
Backend & Cloud	Python (Flask), Google Cloud Run, Docker, Firebase (Functions, Firestore, Auth)
Database & APIs	Firestore, PostgreSQL, SQL, REST APIs
ML & Tools	TensorFlow, Keras, PyTorch, GDAL, Git/GitHub, Android Studio, CI/CD

EXPERIENCE

Founding / Lead Mobile Engineer (Full-Stack)

BabyCue Private Limited

May 2025 – Present
Bhubaneswar, Odisha (Remote)

- Founding and sole engineer owning end-to-end architecture, development, and production operations of **GI Bud**, a gut health mobile application with 300+ active users on the Play Store.
- Engineered the Python/Flask backend on Google Cloud Run, integrating AI-powered tongue analysis to automate health report generation and reduce manual diagnosis time by 80%.
- Designed complex Firebase architecture utilizing Cloud Functions for serverless logic and Storage for secure media management (images, videos, health reports).
- Implemented secure, privacy-first authentication, real-time health risk scoring algorithms, and gender-specific onboarding flows for personalized user experiences.

Software Engineer

Sallet IT Soft Private Limited

Feb 2025 – May 2025
Bhubaneswar, Odisha

- Collaborated with the engineering team to develop and maintain scalable Flutter mobile applications following Clean Architecture principles, ensuring high code quality.
- Optimized application performance by refactoring legacy code modules, resulting in a 15% reduction in app load time and improved maintainability.

Mobile Application Developer Intern

BabyCue Private Limited

Oct 2024 – Jan 2025
Bhubaneswar, Odisha (Remote)

- Designed and built the initial MVP (Minimum Viable Product) for the **GI Bud** app, establishing the foundational project structure.
- Architected the Flutter frontend using GetX state management and MVC pattern.
- Configured the initial Firebase Firestore schema to enable real-time data synchronization for early test users.

PROJECTS

Ikshana (Satellite Terrain Analysis) – Flask, Python, TensorFlow, React

[GitHub](#)

- Winner, Smart India Hackathon 2023** (Software Edition) – Ranked Top 10 among 10,000+ teams nationally for building advanced terrain recognition system.
- Engineered Flask backend with deep learning models (Keras/TensorFlow) for satellite image analysis, classifying terrain types (grassy, marshy, rocky, sandy) and performing segmentation of mixed terrains.
- Integrated GDAL library and OpenTopography API for geospatial data processing, calculating terrain indices (TRI, TPI, roughness, slope, aspect) with React frontend for interactive visualization.

Leaf-AgriApp (Kishan Mitr) – Flutter, Flask, PyTorch

[GitHub](#)

- Built mobile agriculture assistant app using Flutter with AI-powered crop disease detection achieving 96% accuracy using PyTorch models trained on 50,000+ plant disease images.
- Integrated conversational AI chatbot using OpenAI GPT-3 API for personalized farming recommendations in Hindi/English, and real-time mandi commodity price tracking via Government of India Open Data API.
- Architected offline-first architecture enabling diagnosis and advisory features in low-connectivity rural areas using optimized PyTorch models.

ACHIEVEMENTS

- Winner, Smart India Hackathon 2023** – Ranked Top 10 nationally out of 10,000+ teams for Ikshana (Satellite Terrain Analysis System). [Certificate](#)
- Startup Mahakumbh 2024** – Presented **Ikshana** at a national startup showcase featuring 2000+ startups and 165+ investors in New Delhi. [Invitation](#)
