

Manas Ranjan Sethi

Flutter Engineer | AI / ML | Health Tech

+91-8847879562 • [LinkedIn](#) • [GitHub](#) • manassethi2201@gmail.com • Odisha, India

TECHNICAL SKILLS

Mobile Development	Flutter, Dart, GetX, Provider, BLoC, Riverpod, Clean Architecture, MVC, IAP
Backend & Cloud	Python (Flask), Google Cloud Run, Docker, Firebase (Functions, Firestore, Auth, Storage)
On-Device AI / ML	TFLite, EfficientNetB0, Grad-CAM, PyTorch, TensorFlow, Keras, Edge AI, Model Optimization
GenAI & NLP	LLM API Integration, Prompt Engineering, RAG, Conversational AI
Database & APIs	Firebase, PostgreSQL, SQL, REST APIs
Tooling	Git/GitHub, Android Studio, CI/CD, Docker, Agile

EXPERIENCE

Founding / Lead Mobile Engineer (Full-Stack)

BabyCue Private Limited

May 2025 – Present

Bhubaneswar, Odisha (Remote)

- Sole founding engineer owning end-to-end architecture, development, and production of **GI Bud** – a gut health app with **300+ active users** on the Play Store; engineered Riverpod + Clean Architecture codebase for scalability.
- Built on-device tongue disease classifier using **EfficientNetB0 TFLite** (Grad-CAM visualization) integrated into Flutter, enabling privacy-first AI diagnosis without cloud dependency.
- Engineered Python/Flask backend on Google Cloud Run with AI-powered tongue analysis, automating health report generation and reducing manual diagnosis time by **80%**.
- Designed Firebase architecture (Cloud Functions, Firestore, Storage) with secure auth, real-time health risk scoring algorithms, and gender-specific personalized reports.

Software Engineer

Sallet IT Soft Private Limited

Feb 2025 – May 2025

Bhubaneswar, Odisha

- Developed and maintained scalable Flutter mobile applications following **Clean Architecture** principles with high code quality and test coverage.
- Refactored legacy code modules, achieving a **15% reduction in app load time** and improved long-term maintainability.

Mobile Application Developer Intern

BabyCue Private Limited

Oct 2024 – Jan 2025

Bhubaneswar, Odisha (Remote)

- Built the initial MVP for GI Bud, architecting the Flutter frontend with GetX state management (MVC pattern) and configuring the Firebase Firestore schema for real-time data sync.

PROJECTS

MediMind – AI Chronic Illness Companion (Flutter, Gemini API, Isar, Riverpod)

In Development

- Co-building AI-powered chronic illness app targeting South/Southeast Asian markets; leading Flutter architecture with Clean Architecture + Riverpod (code-gen), Isar local DB, and offline-first design.
- Hybrid AI strategy: three custom on-device ML models (Symptom NLP Parser via MuRIL, Pattern Detection via TCN/LSTM, Prescription NER via BiLSTR-CRF) + Gemini API for plain-language output.

Ikshana (Satellite Terrain Analysis) – Flask, Python, TensorFlow, React

[GitHub](#)

- Winner, Smart India Hackathon 2023** – Top 10 of 10,000+ teams; Flask backend with Keras/TensorFlow deep learning for satellite image terrain classification and segmentation.
- Integrated GDAL + OpenTopography API for geospatial indices (TRI, TPI, roughness, slope, aspect); React frontend for interactive visualization. Presented at **Startup Mahakumbh 2024** (2000+ startups, 165+ investors).

Leaf-AgriApp (Kishan Mitr) – Flutter, Flask, PyTorch

[GitHub](#)

- AI crop disease detection app (**96% accuracy**, PyTorch, 50K+ images); integrated **LLM API** for conversational farming recommendations (Hindi/English) and offline-first on-device PyTorch inference.

EDUCATION

B.Tech in Computer Science and Engineering

GIET University

2021 – 2025

Gunupur, Odisha

ACHIEVEMENTS

- Winner, Smart India Hackathon 2023** – Top 10 nationally out of 10,000+ teams for Ikshana (Satellite Terrain Analysis System). [Certificate](#)
- Startup Mahakumbh 2024** – Presented Ikshana at national startup showcase (2000+ startups, 165+ investors), New Delhi. [Invitation](#)
